LEAD GRANTEE

## ROUTINE IMMUNIZATION UPDATE

PROJECT DIVA · QUARTER 3, 2026

JULY · SEPTEMBER 2026 | GWAGWALADA AREA COUNCIL, FCT

# CEYWI • Who We Are

## OUR PURPOSE

A humanitarian, not-for-profit and non-governmental organization founded in 2012, serving as a platform for good governance and societal development.

## ABOUT CEYWI

21ST CENTURY COMMUNITY EMPOWERMENT FOR YOUTH & WOMEN INITIATIVE is a humanitarian, not for profit, and non-governmental organization founded in 2012. Its mission is to serve as a platform for good governance and societal development through policy advocacy for inclusive participation and people-centred research towards sustainable peace and development.

### VISION

A society built with a legitimate and inclusive social contract, living harmoniously, recognizing and predicated on the agency of youth and women.

### MISSION

To serve as a platform for good governance and societal development through policy advocacy for inclusive participation and people-centred research.

### CORE VALUES

Human dignity • Integrity • Professionalism • Transparency • Inclusiveness  
• Accountability • Gender equity • Collaboration.

## CEYWI & HEALTH-SECTOR ACCOUNTABILITY

CEYWI's stated focus includes health-sector advocacy and accountability, alongside advocacy, capacity building, networking and collaboration — areas that support its role in Project DIVA implementation.

# Project DIVA • What It Is

## DATA • IMMUNIZATION • VERIFICATION • ACCOUNTABILITY

Project DIVA is a community-anchored, data-triangulated initiative designed to close the zero-dose gap across the Federal Capital Territory's six Area Councils. It identifies, verifies, and supports every missed child to reach government-led immunization services.

### Goal:

Achieve an 81% reduction in the zero-dose burden — from 15,872 to 3,000 children — by identifying, referring and supporting 12,872 zero-dose children to vaccination over 18 months (July 2026 – December 2027).

## HOW DIVA DELIVERS

### Community Driven

Mobilization and verification led by CBOs and community structures

### Data Driven

ODK & DHIS2-linked tracking and facility-community reconciliation

### Sustained

Capacity building and transition to full Government ownership

## PARTNERS & ROLES

### LEAD GRANTEE

Vaccine Network for Disease Control (VNDC)

Overall coordination, strategy, Gavi compliance, technical systems and accountability support.

### IMPLEMENTING PARTNER — GWAGWALADA

**21st Century Community Empowerment for Youth & Women Initiative (CEYWI)**

Community-level implementation, mobilization, house-to-house verification, data support and grassroots advocacy in Gwagwalada Area Council.

# From preparation to community action

## A QUARTER BUILT IN SEQUENCE

During July–September 2026, CEYWI's implementation of Project DIVA in Gwagwalada Area Council progressed from partner preparation, stakeholders mapping and advocacy to community entry, micro-planning, volunteers training, outreach, review, data validation, supportive supervision and PHC-level planning.

## OUR IMPLEMENTATION FACILITIES

### 12 Facilities

- |                    |                |                    |
|--------------------|----------------|--------------------|
| 1. Ibwa 1 PHC      | 5. Wumi PHC    | 9. Chitumu PHC     |
| 2. Ibwa 2 PHC      | 6. Pabeyi PHC  | 10. Tunga Gaya PHC |
| 3. Kaida Tsofo PHC | 7. Kasanki PHC | 11. Shenegu PHC    |
| 4. Gurufata PHC    | 8. Kpakuru PHC | 12. Kaida Sabo PHC |

### Impact Outreach Facilities

- |                        |                    |                  |
|------------------------|--------------------|------------------|
| 1. Anagada PHC         | 4. Angwar Dodo PHC | 7. Zuba PHC      |
| 2. Yimi PHC            | 5. Kuntunku PHC    | 8. Tungamaje PHC |
| 3. Township Clinic PHC | 6. Dagiri PHC      |                  |

Number of wards: 8 out of 10

Total number of PHCs: 20 out of 40

## IMPLEMENTATION STRATEGY

- |    |                |                                                                                      |
|----|----------------|--------------------------------------------------------------------------------------|
| 01 | <b>PREPARE</b> | Partner training established a shared foundation.                                    |
| 02 | <b>ENGAGE</b>  | Advocacy and community entry strengthened stakeholder ownership.                     |
| 03 | <b>PLAN</b>    | Micro-planning and volunteer training prepared the field teams.                      |
| 04 | <b>ACT</b>     | Community outreach moved mobilization into households and hard-to-reach settlements. |
| 05 | <b>REVIEW</b>  | VNDC, Area Council and data-validation engagements strengthened accountability.      |

# Three-Day Partner Training

## THE ENGAGEMENT

The quarter opened with a three-day partner training held from 21 to 23 July 2026. The training brought project partners together to build a shared understanding of Project DIVA and to prepare participating organizations for effective implementation.

## WHAT IT STRENGTHENED

CEYWI participated with representatives of the organization. Sessions strengthened understanding of the project's objectives, implementation approach, responsibilities and expectations, while also reinforcing practical areas including community mobilization, data collection and management, monitoring, accountability and engagement with government and community structures.

## KEY TAKEAWAY

The training provided the operational foundation for the activities that followed in Gwagwalada Area Council, with the CEYWI team moving from partner-level preparation into community-level implementation.

## WHY THIS MATTERS

Shared partner understanding created the foundation for coordinated community implementation.

# Advocacy Visit to the First Lady, Gwagwalada Area Council

## THE ENGAGEMENT

On 3 August 2026, CEYWI conducted an advocacy visit to Her Excellency Hajiya Hauwa Mohammed, First Lady of Gwagwalada Area Council, to present the goals, targets and expected outcomes of Project DIVA and seek support for community outreach, sensitization and immunization mobilization.

## WHAT IT STRENGTHENED

The team highlighted the importance of leadership and community support in identifying and reaching children who had not been reached by routine immunization services. The First Lady expressed strong support for the initiative, pledged her commitment and indicated that CEYWI could reach out during outreach activities whenever supplies or other collaboration were required.

## KEY TAKEAWAY

The engagement strengthened high-level stakeholder support for DIVA and created an important channel for collaboration around community mobilization and immunization activities.

## WHY THIS MATTERS

Leadership support opened an important pathway for stronger community mobilization and collaboration.

# VNDC organization capacity assessment

## THE ENGAGEMENT

On 5 August 2026, the Vaccine Network for Disease Control (VNDC) visited CEYWI for a routine compliance check and organizational assessment under Project DIVA.

## WHAT IT STRENGTHENED

The engagement reviewed project implementation processes, documentation, implementation arrangements and compliance requirements. It reinforced the importance of proper documentation, accountability and adherence to established project procedures and expectations.

## KEY TAKEAWAY

The routine engagement supported quality assurance and continuous improvement as CEYWI transitioned into intensive community-level implementation.

## WHY THIS MATTERS

Organization capacity assessment reinforced documentation, accountability and adherence to project requirements.

# Advocacy Visit to Gwagwalada Area Council Health Team

## THE ENGAGEMENT

On 6 August 2026, CEYWI engaged stakeholders at Township Clinic, Gwagwalada Area Council, to strengthen collaboration with the Area Council Health Team and frontline health structures ahead of community entry and field implementation.

## WHAT IT STRENGTHENED

The engagement focused on strengthening understanding of Project DIVA among health stakeholders and establishing effective collaboration between CEYWI, the Area Council Health Team and health facilities. Discussions emphasized identifying children who may have been missed by routine immunization services and connecting them to government-led immunization services.

## KEY TAKEAWAY

The engagement helped prepare the ground for community entry, micro-planning and subsequent outreach by strengthening coordination between the project team and the local health system.

## WHY THIS MATTERS

Health-system engagement strengthened coordination before community entry and field action.

# Community Entry Meeting

## THE ENGAGEMENT

A major community-level milestone was the Community Entry Meeting held at Township Clinic on 17 August 2026. Ward Development Committees, Village Development Committees, religious leaders, Routine Immunization focal persons and other relevant stakeholders were engaged on the purpose and implementation of Project DIVA.

## WHAT IT STRENGTHENED

Participants discussed barriers that contribute to missed immunization, including religious and cultural beliefs, inadequate information and distance from health facilities. The Local Immunization Officer encouraged community structures and leaders to intensify mobilization, while CEYWI explained the role of community-based volunteers in identifying zero-dose and under-immunized children, engaging households and linking children to routine immunization services.

## KEY TAKEAWAY

A key outcome was the commitment of religious, traditional and community leaders to support DIVA. Their commitment was expected to facilitate access, strengthen community ownership, support caregiver mobilization and help address cultural or religious barriers.

## WHY THIS MATTERS

Community ownership created stronger pathways for access, mobilization and identification of missed children.

# Micro-Planning Validation Meeting

## THE ENGAGEMENT

On 18 August 2026, CEYWI participated in a Micro-Planning Validation Meeting with the Gwagwalada Area Council Health Team ahead of the Routine Immunization exercise scheduled for 24–28 August 2026.

## WHAT IT STRENGTHENED

The meeting reviewed and validated plans for the upcoming activities, with attention to community-level priorities and areas requiring greater focus. It strengthened coordination between the project team and health authorities and helped ensure that outreach plans were targeted to communities that may be underserved or difficult to reach.

## KEY TAKEAWAY

The validated micro-plans provided an important bridge between preparation and field action, supporting a more coordinated approach to community outreach and immunization mobilization.

## WHY THIS MATTERS

Validated micro-plans helped translate community priorities into targeted outreach preparation.

# Step-Down Training for Community Volunteers

## THE ENGAGEMENT

On 20 August 2026, CEYWI conducted a step-down training for community volunteers as part of preparations for community-level implementation under Project DIVA. The training was supported by VNDC and Gavi, the Vaccine Alliance.

## WHAT IT STRENGTHENED

The session strengthened volunteers' understanding of their responsibilities, including community mobilization, household engagement, identification of zero-dose and under-immunized children, referral and mobilization for routine immunization, and collection of relevant community-level information.

## KEY TAKEAWAY

The training also emphasized accurate information and proper documentation, preparing volunteers to contribute effectively to the outreach activities that followed.

## WHY THIS MATTERS

Volunteer capacity strengthened household engagement, identification, referral and data responsibilities.

# Community Outreach

24–28 August 2026 • PROJECT DIVA

## THE ENGAGEMENT

From 24 to 28 August 2026, CEYWI conducted community outreach across communities in Gwagwalada Area Council through house-to-house mobilization, supportive supervision, community sensitization and identification of zero-dose and under-immunized children.

## WHAT IT STRENGTHENED

The teams reached Anagada, Yimi, Angwa Dodo, Kuntuku, Shenegu, Ibwa 1, Ibwa 2, Kaida Tsofo, Kaida Sabo, Gurufata, Wumi, Pabeyi, Kasanki, Kpakuru, Chitumu and Tunga Gaya, as well as Fulani and Ruga settlements. Caregivers were engaged on the importance of routine immunization and encouraged to make eligible children available for vaccination.

## KEY TAKEAWAY

One notable outcome was the successful engagement of a previously non-compliant caregiver. Through dialogue and community engagement, concerns were addressed and the children were vaccinated. Field teams also observed low turnout in some compounds where caregivers were occupied with farming activities, highlighting the need for flexible mobilization strategies.

## WHY THIS MATTERS

Direct household engagement brought immunization mobilization closer to communities, including hard-to-reach settlements.

# VNDC Monthly Review/Checking Meeting

## VNDC MONTHLY REVIEW / CHECKING

### REVIEW · ACCOUNTABILITY · FOLLOW-UP

On 1 September 2026, CEYWI continued its engagement with VNDC through a monthly review and checking meeting under Project DIVA. The session provided an opportunity to review implementation progress, documentation, compliance and areas requiring continued attention as field activities progressed in Gwagwalada Area Council.

**KEY FOCUS: DOCUMENTATION · COMPLIANCE · CONTINUOUS IMPROVEMENT**

### THE ENGAGEMENT

On 1 September 2026, CEYWI continued its engagement with VNDC through a monthly review and routine checking process under Project DIVA.

### WHAT IT STRENGTHENED

The engagement formed part of the project's ongoing monitoring, coordination and accountability mechanism. It provided an opportunity to review implementation progress, documentation, compliance and areas requiring continued attention.

### KEY TAKEAWAY

The review reinforced the importance of proper project documentation, accountability, adherence to implementation requirements and continuous improvement, while strengthening coordination between CEYWI and VNDC.

### WHY THIS MATTERS

Ongoing review kept implementation focused on compliance, documentation and continuous improvement.

# Monthly Review/Advocacy Meeting with Area Council Health Team

## THE ENGAGEMENT

On 4 September 2026, CEYWI participated in a monthly review and advocacy engagement with the Gwagwalada Area Council Health Team. The meeting reviewed implementation experiences and identified areas requiring further intervention.

## WHAT IT STRENGTHENED

A major focus was the validation of information generated through fixed and impact outreach vaccination activities. The team emphasized accurate, complete and properly documented field information before upload into DHIS2. Communities with high numbers of zero-dose and under-immunized children were highlighted for targeted advocacy and additional intervention.

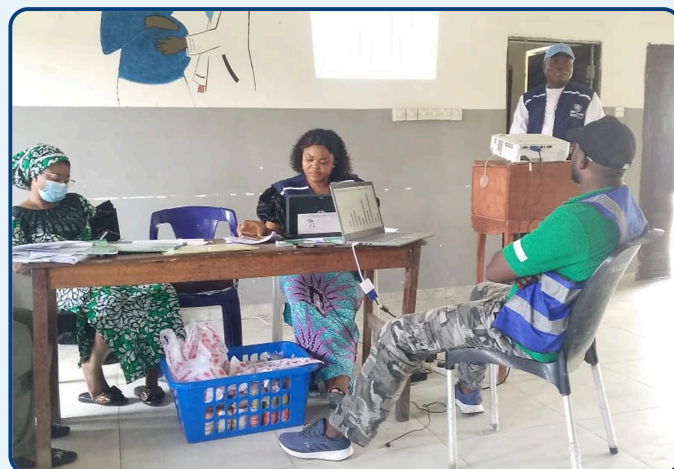

## KEY TAKEAWAY

The meeting also proposed identifying and training influential women from different wards as Community Champions to support caregiver mobilization, address vaccine hesitancy and strengthen immunization messaging within communities.

## WHY THIS MATTERS

Review and advocacy linked field experience with data quality, targeted intervention and community champion planning.

# Data Validation Meeting

## THE ENGAGEMENT

On 7 September 2026, CEYWI's DIVA team participated in a Data Validation Meeting at the Township Clinic Main Events Hall with trackers and members of the vaccination team who had participated in the recent impact outreach activities.

## WHAT IT STRENGTHENED

Teams presented their data one after another for review and discussion. The WHO focal person, Mr. Eze, also presented vaccination data for July 2026, including categorization of PHCs according to performance levels.

## KEY TAKEAWAY

The exercise strengthened the review of field-generated information, helped identify reporting and facility-performance gaps, and supported better understanding of areas requiring further attention before information is incorporated into the health reporting system.

## WHY THIS MATTERS

Data validation strengthened the bridge between field reporting, facility performance review and health-system reporting.

# Micro-Planning Meeting with Yimi PHC

## THE ENGAGEMENT

On 8 September 2026, CEYWI held a Micro-Planning Meeting with the Yimi Primary Health Care team to review current performance and develop practical strategies to improve service delivery and uptake in Yimi and surrounding communities.

## WHAT IT STRENGTHENED

Yimi PHC was identified as a low-performing PHC, making the engagement important for identifying gaps and building practical responses. The team reflected on lessons from previous impact outreach activities, including what worked, what did not work and how CEYWI could better support the facility.

## KEY TAKEAWAY

A major focus was reaching difficult-to-access Ruga/Fulani settlements. Communities discussed included Ruga Bani, Ruga Gari, Ruga Lobi, Ruga Ango, Ruga School, Ruga Yellow, Ruga Fulani, Ruga Bello Dango, Ruga Bariyir and Ruga Idris Hamme, among others.

## WHY THIS MATTERS

PHC-level planning focused attention on performance gaps and the specific realities of Ruga/Fulani settlements.

# Re-Training of Community Volunteers on Kobo Collect

## THE ENGAGEMENT

On 9 September 2026, 21st Century Community Empowerment for Youth & Women Initiative (CEYWI) held a re-training session for community volunteers on the use of Kobo Collect at Township Clinic, Gwagwalada.

## WHAT IT STRENGTHENED

The session focused on strengthening volunteers' capacity to use the Kobo Collect platform effectively for accurate and timely data collection and reporting. The re-training provided an opportunity to reinforce practical understanding and promote consistency in community-level data capture.

## KEY TAKEAWAY

The activity complemented the project's wider emphasis on data quality, accountability and evidence-based implementation, strengthening the link between field activity and reliable project reporting.

## WHY THIS MATTERS

Kobo Collect re-training reinforced timely, accurate and consistent community-level data collection and reporting.

# VNDC Visited CEYWI

14 September 2026 • PROJECT DIVA

## THE ENGAGEMENT

On 14 September 2026, the Vaccine Network for Disease Control (VNDC) visited CEYWI for a monitoring and assessment visit. Community volunteers were also present, and the team engaged with and assessed the volunteers and their ongoing activities under the DIVA Project.

## WHAT IT STRENGTHENED

The visit provided an opportunity to assess volunteer engagement, review ongoing field activities and strengthen monitoring, coordination and accountability under Project DIVA.

## KEY TAKEAWAY

The engagement reinforced the importance of regular monitoring and direct interaction with community volunteers to support effective implementation and sustained field performance.

## WHY THIS MATTERS

Monitoring visits strengthen accountability, identify areas requiring support and keep community-level implementation aligned with Project DIVA objectives.

# Supportive Supervision Meeting with RI Focal Persons

17 September 2026 • PROJECT DIVA

## THE ENGAGEMENT

On 17 September 2026, 21st Century Community Empowerment for Youth and Women Initiative (CEYWI) held a supportive supervision meeting with Routine Immunization (RI) focal persons from targeted PHCs under the Data for Immunization Verification Accountability (DIVA) Project, in collaboration with the Vaccine Network for Disease Control (VNDC).

## WHAT IT STRENGTHENED

The meeting provided an opportunity to strengthen the relationship and collaboration between RI focal persons and community volunteers at the facility level. Discussions focused on clarifying roles and responsibilities, improving routine immunization interventions, strengthening data entry and reporting, and ensuring proper validation of immunization data.

## KEY TAKEAWAY

The engagement also highlighted the importance of coordinated efforts in identifying and reaching zero-dose and under-immunized children within the targeted communities.

## WHY THIS MATTERS

Supportive supervision strengthened facility-level collaboration and reinforced data quality ahead of the close of the quarter.

# Community Outreach

## THE ENGAGEMENT

The 21st Century Community Empowerment for Youth and Women Initiative team conducted another house-to-house mobilization, supportive supervision, and immunization activities (IMPACT OUTREACH) in the month of September to identify and vaccinate Zero-Dose and under-immunized children in Anagada, Yimi, Angwa Dodo, Kuntuku, Shenegu, Ibwa 1, Ibwa 2, Kaida Tsofo, Kaida Sabo, Gurufata, Wumi, Pabeyi, Kasanki, Kpakuru, Chitumu and Tunga Gaya all in Gwagwalada Area Council of FCT.

## WHAT IT STRENGTHENED

Caregivers were engaged and sensitized to bring eligible children between the age of 12-23 months for vaccination, while a previously non-compliant caregiver were also reached and the children vaccinated. Key challenges included low turnout in some compounds due to farming activities and religious beliefs, while Fulani settlements popularly called 'Ruga' were visited for the routine immunization service.

## KEY TAKEAWAY

Strengthening defaulter tracing, and maintaining collaboration with community leaders and Ward Development Committees and religious leaders.

### WHY THIS MATTERS

Direct household engagement and impact outreach brought immunization mobilization closer to communities, including hard-to-reach settlements, while reinforcing defaulter tracing and community leadership collaboration.

# PIRI Community Outreach

## THE ENGAGEMENT

CEYWI supported the Periodic Intensification of Routine Immunization (PIRI) outreach across Gwagwalada Area Council. The outreach covered communities and health facilities within the project's implementation area, including Anagada, Yimi, Angwa Dodo, Kuntuku, Shenegu, Ibwa 1, Ibwa 2, Kaida Tsofo, Kaida Sabo, Gurufata, Wumi, Pabeyi, Kasanki, Kpakuru, Chitumu, Zuba, Tungamaje and Tunga Gaya. The engagement supported community-level immunization activities and strengthened efforts to reach children who may have been missed by routine immunization services.

## WHAT IT STRENGTHENED

The PIRI outreach strengthened community mobilization, routine immunization uptake and identification of zero-dose and under-immunized children across targeted communities. It also reinforced collaboration between community structures, volunteers and health facilities, helping to connect eligible children with available immunization services and supporting continued tracking and follow-up at community level.

## KEY TAKEAWAY

The outreach demonstrated the importance of bringing routine immunization services and mobilization closer to communities, particularly in areas where children may be missed by routine services. Continued collaboration between CEYWI, community volunteers and health facilities remains important for identifying, reaching, referring and following up zero-dose and under-immunized children.

## WHY THIS MATTERS

**Sustained community outreach helps close immunization gaps by taking mobilization closer to households and strengthening the link between communities, volunteers and health facilities.**

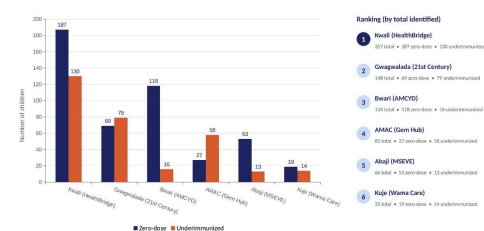

# The numbers behind the work

## DATA PROGRESSION SNAPSHOT

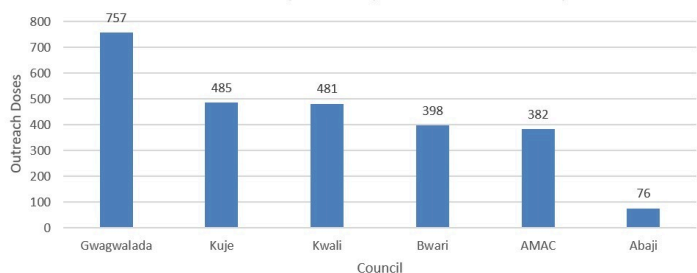

The supplied charts show successive project data snapshots. Gwagwalada (21st Century) appears in the charts moving from rank 2 to rank 1 and back to rank 2 by total children identified.

### Zero-dose & underimmunized children identified

Ranked by total children identified – best to least performing CBO, Project DWA (6 FCT Area Councils)

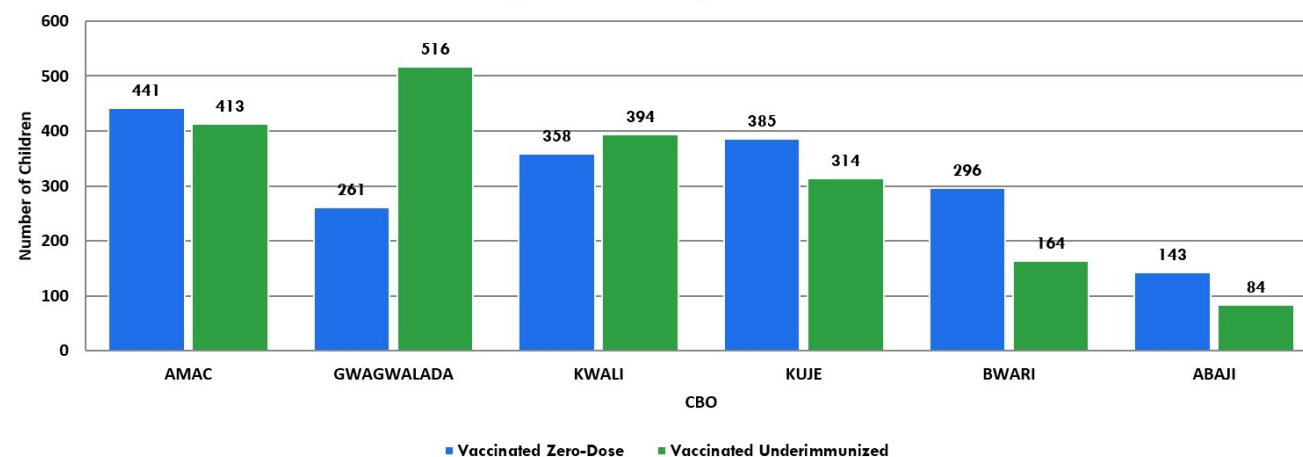

### Outreach Doses by Council (Ranked, Best to Least)

DHIS2 RECORD

### Vaccinated Zero-Dose & Underimmunized Children by CBO

Ranked Highest to Lowest by Total Vaccinated

RECORD AS OF 24 SEPTEMBER 2026

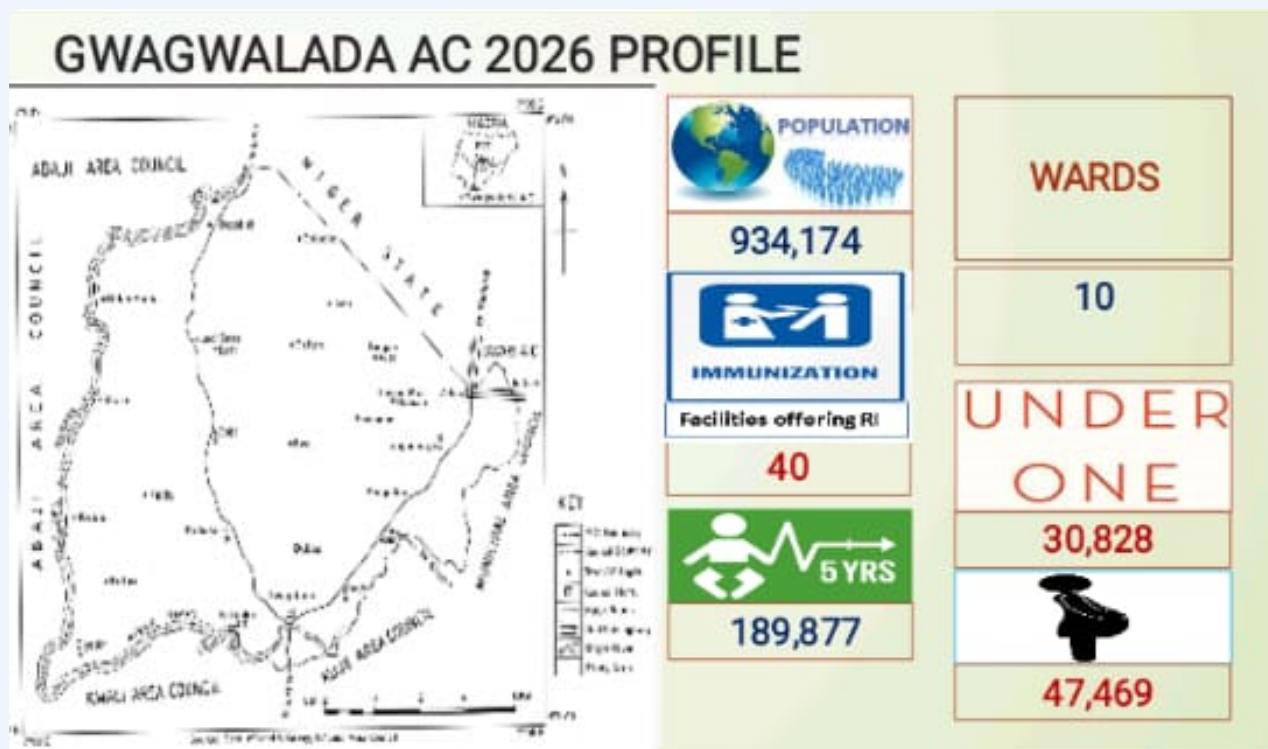

Data presented in this section reflect ongoing project documentation and field reporting. Figures are subject to change as community-level identification, verification, referrals and routine immunization records continue to be updated throughout implementation.

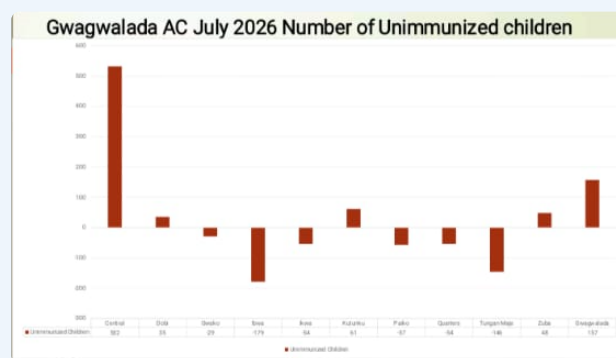

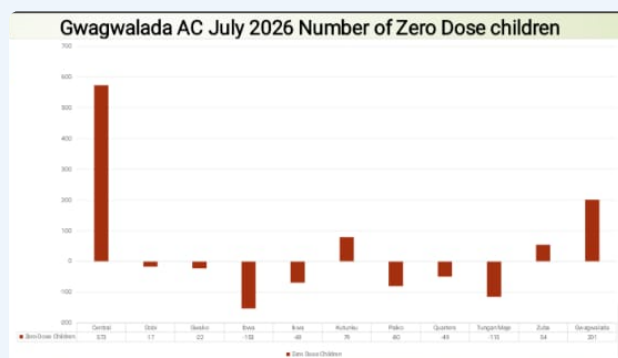

# Gwagwalada Area Council at a glance

## LOCAL PROFILE & IMMUNIZATION CONTEXT

A visual snapshot of the Area Council context supporting Project DIVA implementation.

Area Council profile: population, wards and key age-group indicators.

July 2026: zero-dose children identified across Gwagwalada wards. July 2026: under-immunized children identified across Gwagwalada wards.

### WHY THIS MATTERS

Understanding the Area Council profile and ward-level immunization picture helps position community engagement, outreach and accountability efforts where missed and under-immunized children are being identified.

# Stakeholder reflections

## VOICE FROM THE FIELD

*"I can tell you that VNDC tracker since they have started working in Gwagwalada Area Council is exceptional. They are tracking bumper to bumper of the zero dose children in the Community."*

— Local Immunization Officer (LIO)

CEYWI CEO

## A KEY DRIVER OF PROJECT DIVA

Mr. Adefolahan Lukman, CEO of CEYWI, has played a central leadership role in driving Project DIVA implementation in Gwagwalada Area Council. His leadership has helped connect project strategy with stakeholders engagement, community action, field coordination and accountability.

Leadership · Coordination · Implementation

## FIELD LEARNING · OUTREACH APPROACH

### Improving Outreach Approaches in Gwagwalada

#### WHAT WAS OBSERVED

In Gwagwalada, we observed that health workers conducting outreach activities often went to a particular designated location close to them, and remained there throughout the outreach session until it was time to leave. While this approach provided services at the selected location, it limited the ability to reach children and caregivers living in other parts of the communities.

#### ACTION TAKEN AND OUTCOME

Deployed supportive supervision and encouraged vaccinators to adopt a more mobile and community-focused approach.

#### KEY LESSON

*This experience showed that bringing services closer is great and highlighted the important role CBOs can play in supporting health workers to adapt approaches based on the realities observed within communities.*

# CEYWI DIVA PROJECT TEAM

# Sustaining the momentum

## PRIORITIES FOR CONTINUED IMPLEMENTATION

- 1 Continue household and community mobilization, with attention to underserved and hard-to-reach settlements.
- 2 Strengthen defaulter tracing and monitoring of routine immunization sessions after outreach.
- 3 Use validated field data to guide targeted advocacy and intervention in communities with high zero-dose and under-immunized populations.
- 4 Continue collaboration with WDCs, religious and community leaders, PHCs, the Area Council Health Team and project partners.
- 5 Reinforce volunteer capacity in Kobo Collect and promote timely, accurate and complete community-level reporting.
- 6 Support PHC-level micro-planning, particularly where performance gaps and access barriers require tailored strategies.

### THE QUARTER'S BIGGER PICTURE

The July–September 2026 period established a strong foundation for continued Project DIVA implementation in Gwagwalada Area Council. The sequence of activities connected partner readiness with community action, and community action with data review and facility-level planning.

#### DATA • IMMUNIZATION • VERIFICATION • ACCOUNTABILITY

*Leaving no child behind through evidence, community engagement and accountability.*
